Art Unit: 1714

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 6407166 Wang et al..

Wang et al. discloses the instantly claimed carbon black and its amount for use in air conditioning sealing materials and the matrix can be butyl rubber. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the instantly claimed amount of the instantly claimed carbon black in butyl rubber matrix as the instantly claimed air conditioner components because these are encompassed by the patentee and would have been expected to give the properties disclosed by the patentee to such seals. See column 3, lines 38-43; column 11, lines 6-17; column 12, lines 34-55 and the entirety of the reference.
